

NETTING

NYLON ANZALON TWISTED

- The Super Twist netting program starts with twine n° 625 SUT (Rtex 18 500) and is specially used for the manufacture of large and very large mesh fore nets of pelagic (midwater) trawls.
- Some advantages of this product are:
 - Increase in breaking strength
 - Small tight knots
 - Lower water resistance
 - Excellent mesh stability
- Note: Super Twist is only being supplied as netting. For mending purposes the twisted twines of identical twines numbers have to be used.

REF.	Runnage (m/kg)	Minimum Breaking Strength (kgf)
210/66	510	89
210/78	425	105
210/96	350	140
210/120	270	185
210/144	235	210
