

NETTING

BRAIDED POLYETHYLENE

Polyethylene Braided Netting has been traditionally used in the past as the top material in the trawl industry. Some of the advantages of this material are:

- It floats.
- Lower operating costs.
- Very good abrasion properties.
- Efficient fishing.
- Clean fishing.

Diameter (mm)	Runnage (m/kg)	Minimum Breaking Strength (kgf)
1.8	615	60
2.5	405	100
3.0	274	120
3.5	232	160
4.0	190	185
4.5	168	200
5.0	125	280
5.5	85	350
6.0	75	380
8.0	37	650
